Professional Summary

Senior AI Engineer with 7+ years across software, data engineering and AI systems. Builds Python and Azure applications for document intelligence, retrieval-augmented generation (RAG) and workflow automation. Delivered a lease-abstraction platform for life sciences REITs, developed knowledge assistants and cut legacy script code by 75%. Focuses on useful outputs, clear validation and reliable production delivery.

Professional Experience

Senior AI Engineer | AI Rafay Consulting

Karachi | Sep 2025 - Present

- Reduced manual lease-review work by building an AI abstraction platform for life sciences REITs, turning commercial documents into structured information for acquisition and asset-management teams.
- Supported varied biotech and pharmaceutical lease formats with a multi-parser pipeline combining PDFPlumber, Azure Mistral OCR and dynamic heading extraction.
- Improved abstraction speed and consistency with OpenAI and Azure Mistral extraction workflows that mapped unstructured lease content into organized fields and metadata.
- Established tenant isolation in Azure Blob Storage and Cosmos DB, separating scanned documents and processed outputs to support a multi-tenant document-processing platform.
- Improved reliability with data validation and graceful handling of non-critical failures; added streaming uploads, progress reporting and stage-level timing to make processing easier to monitor.

Python/AI Engineer | dinCloud

Karachi | Jul 2021 - Aug 2025

- Turned multi-source data processing into modular, testable ELT workflows using Python, SQL, Apache Airflow and dbt, combining pipeline orchestration with automated transformations.
- Enabled analytics dashboards and ad hoc business reporting by designing warehouse schemas and data models in Redshift and PostgreSQL.
- Delivered a voice-assistant prototype connecting Whisper speech-to-text with GPT-4 responses; refined prompt templates to improve conversational response quality and latency.
- Integrated AI features into applications through Python APIs and cloud services, supported by validation, monitoring and automated data-processing workflows.

Full Stack Developer | Web Projects Sendirian Berhad (SDN BHD)

Islamabad | Mar 2020 - Mar 2021

- Built responsive ReactJS interfaces with JavaScript, HTML, CSS and Material UI, connecting user-facing features to back-end APIs.
- Developed, debugged and tested APIs, collaborating through Git and Bitbucket in an agile team.

Professional Experience (continued)

Data Analyst | Vizz Web Solutions

Islamabad | Jan 2019 - Feb 2020

- Reduced legacy script code by 75% by migrating Node.js scripts to Python, simplifying the implementation of existing data-processing tasks.
- Automated text collection and real-time ingestion using REST APIs, Tweepy, Telethon and GoogleNewsAPI, preparing source data for NLP analysis.
- Analyzed sentiment with TextBlob and VADER, and managed source and processed text in MongoDB through PyMongo.

Selected AI Projects

GenAI Knowledge Assistant: Built document Q&A with OpenAI, LangChain, LlamaIndex, Pinecone and FastAPI, combining embedding search and prompt chains for internal documentation and policy archives.

AI Workflow Automation: Connected Azure OpenAI, Azure Functions, Python, Airflow and dbt to orchestrate inference, data transformations and quality checks for scheduled insights and alerts.

Technical Skills

Python & APIs: Python, SQL, FastAPI, Flask, Django, REST APIs, JavaScript

LLM Frameworks & Retrieval: LangChain, LangGraph, LlamaIndex, RAG, Azure AI Search, Pinecone, FAISS, prompt engineering

AI & Evaluation: Azure OpenAI, OpenAI GPT, Azure Mistral OCR, Whisper, structured extraction, Hugging Face Transformers, PyTorch, scikit-learn, model evaluation

Data Engineering: Airflow, dbt, ETL/ELT, PostgreSQL, Redshift, MongoDB, Cosmos DB, Pandas, NumPy

Cloud & Delivery: Azure, AWS, Azure Functions, Blob Storage, Docker, Kubernetes, CI/CD, Git, data validation and monitoring

Education

Bachelor of Science in Computer Science | COMSATS University Islamabad | 2014 - 2019

Certifications & Training

Microsoft Azure AI certification | Nov 2025

CS50's Introduction to Artificial Intelligence with Python | Harvard University / edX | Apr 2022

AI Fundamentals | DataCamp | Dec 2021

AI For Everyone | DeepLearning.AI / Coursera | Jul 2019

Using Python to Access Web Data | University of Michigan / Coursera | Dec 2018
